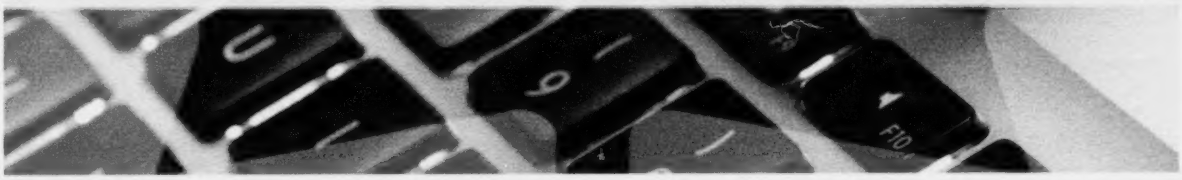
Trade-marks Journal

2017-09-06 — Vol. 64 No. 3280



Canada

Trade-marks Journal

Vol. 64 No. 3280

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Class 09

Computer software for representing graphics in two and three dimensions, namely computer-assisted design (CAD) software, computer software for digital animation and special effects (for images), computer software for simulating the creation of real biological, chemical, physical and mechanical phenomena and objects, computer software for publishing (online and on CD) electronic magazines, documents, namely scientific papers, information and data related to science, biology, chemistry, the human body and health in general, computer software for searching documents online and on CD, namely scientific papers, scientific publications, scientific journals and web pages in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, computer software for the simplification and optimization of geometric objects and real biological, chemical, physical and mechanical phenomena in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, computer software for the computerized and industrial monitoring of real biological, chemical, physical and mechanical phenomena whose purpose is to verify the proper functioning of the computer system in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; imaging software, namely computer-assisted imaging for computer-assisted design, geometric modelling animation, simulation of the creation of real biological, chemical, physical and mechanical phenomena and objects; computer-assisted maintenance management software, namely maintenance of computer hardware in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; computer software for presenting information on industrial products, namely computer software for presenting scientific and technical data enabling users to model a product based on the scientific and technical data presented in the computer software in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; game design software; computer software enabling data exchange, namely database management software; educational game software in the fields of science, biology, chemistry, the human body and health in general; training software in the fields of biology, chemistry, the human body and health in general, computer-assisted design, geometric modelling and simulation; educational software in the fields of biology, chemistry, the human body and health in general; word processing software; teaching software, namely for teaching techniques for representing graphics in two and three dimensions in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; CD-ROMs, namely pre-recorded CD-ROMs containing graphics in two and three dimensions, namely animated or non-animated models of molecular systems containing data, models representing genetic, chemical, and biological data in the form of diagrams, pictures, charts in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; CD-ROMs containing computer games, DVDs, namely DVDs containing graphics in two and three dimensions, namely animated or non-animated models of molecular systems containing data, models representing genetic, chemical and biological data in the form of diagrams, pictures, charts in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, DVDs containing computer games, mini disks, namely pre-recorded mini disks containing graphics in two and three dimensions, namely animated or non-animated models of molecular systems containing data, models representing genetic, chemical and biological data in the form of diagrams, pictures, charts in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, mini disks containing computer games and floppy discs, namely floppy discs containing graphics in two and three dimensions, namely animated or non-animated models of molecular systems containing data, models representing genetic, chemical and biological data in the form of diagrams, pictures, charts in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general.

SERVICES

Class 38

(1) Telecommunications, namely provision of multiple-user access to a computer network; provision of discussion forums on the Internet and online in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; exchange of electronic data, namely scientific and technical data in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general by means of computer technology, namely via computers, the Internet, cloud storage, servers; rental of access time to a computer database in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; transmission of computer programs, namely simulation, modelling, digitization, forecasting software in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, by means of fibre optics, computer protocol, satellite, facsimile, cable, computer, computer terminals, global computer networks, telephone, email, by electronic means, and through the Internet, accessible by access code through customized network page interfaces; provision of access enabling the temporary use of non-downloadable software applications for 3D and 2D modeling and simulation in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; provision of access to an Internet site offering technology allowing online users to share information in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general on several Internet sites; provision of access to scientific and technical data, from searchable directories and databases, namely texts, files, models, still and animated images in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general.

Class 42

(2) SaaS-type software in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, enabling the online, temporary, and permanent provision of simulation, presentation, modelling software, computer software for sharing

data (non-downloadable), namely texts, files, models, still and animated images, computer software in the field of cloud computing, computer software for others for managing and controlling access to software applications in the fields of modelling, simulation, presentation of computer software for sharing data, for computer-assisted design (CAD), for computer-aided manufacturing (CAM), for presenting information on industrial products related to the fields of biology, chemistry, the human body and health in general, for sharing data, namely texts, files, models, still and animated images related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general and CAM/CAD collaborations, for managing the life cycle of products related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, for presenting information on industrial products related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, enabling users of computers, personal digital assistants, portable telephones to access and use software development and programming tools related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, for creating personalized online information services related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, enabling access to a private collection of information in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, enabling access to information through a wide range of texts, databases, namely files, models, still and animated images, graphics and audiovisual information related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; mining and analysis of data, namely texts, files, models, still and animated images related to the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; creation of websites; creation, development, installation, maintenance and updating of computer software and computer programs (recorded); computer services, namely creation of virtual communities that enable registered users to organize groups and events, participate in discussions and in professional, community and social networking in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general (creation of websites for others); computer consultant services in the fields of software as a service (SaaS) and platforms as a service (PaaS); technical consultant services related to cloud computing, namely creation, management, and rollout of data centre architecture, Internet and virtualization technology for public, private, and hybrid computing clouds; software testing services for others; computer programming services; rental of computer software; computer services, namely web hosting services via cloud computing for others for organizing and holding online meetings, events and interactive discussions via communications networks; temporary provision of software applications for 3D and 2D modelling and simulation in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, software application development tools, namely web interfaces and databases in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, and computer network infrastructure, namely available through others and provided by others and enabling others to host and provide others with models for software as a service (SaaS), plaftorms as a service (PaaS) providing software platforms, infrastructure as a service (IaaS), namely computer servers, cloud computing servers providing SaaS, PaaS and IaaS models in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; computer engineering and technical consulting regarding the design of products and production means in the fields of pharmacy, modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general, and the flow of industrial processes in the fields of modelling and the scientific digitization of life, molecules, biology, chemistry, the human body and health in general; technical support services enabling the customization of computer software to adapt it to specific needs as per the client's activities and work processes.

Goods

(1) (a) machines and machine tools as well as their parts, namely, automated machines and machine tools as well as their parts in the nature of drives for motors, drives for vacuum pumps, gear drives, drives for machines, electric generators, turbines other than for land vehicles, namely, wind turbines, turbines for generation of electricity, turbines for jet engines, steam turbines and industrial gas turbines for power generation and industrial gas turbines for mechanical drive, turbochargers for internal combustion engines, electricity generators, spindles being parts of machines, high frequency motor spindles with high frequency electric converters and power supply units; motors, drive systems and hydraulic motors (other than for land vehicles), namely, electric motors for machines and electric generators, electric control panels for machines, engines and motors, electric drives for machines, driving motors other than for land vehicles, in particular for ship propulsion, hydraulic engines and motors comprising hydraulic pumps, hydraulic conveyors, hydraulic circuits for machines; machine coupling and transmission components; electricity generators and current generators, wind powered generators; conveyors and transportation equipment as far as contained, namely, conveyor belts and conveyors, pneumatic conveyors; conveyor belts and tapes; mechanical and electronical control mechanisms for machines, engines and motors, namely, pneumatic control panels for machines, motors and engines; industrial robots; turbochargers for internal combustion engines; pumps, namely, centrifugal pumps, electric pumps, compressed air pumps, pumps as parts of machines, motors, and engines, hydraulic pumps and pneumatic pumps; compressors, namely, air compressors, electric compressors, centrifugal compressors, compressors as parts of machines, motors and engines; mills, namely, grinding mills, rolling mills, rod mills, bar mills, rod and bar mills, heavy, medium and light section mills, rail mills, blooming mills and billet mills; floating or non-floating drilling rigs; elevator operating apparatus, namely, elevator lifts, elevator motors; (b) scientific, nautical, surveying, optical, weighing, measuring, analyzing, indicating, signaling and monitoring apparatus, instruments and devices, including parts for all the aforementioned goods, namely, timers for recording and measuring electric currents, ammeters, volt meters, control and protective equipment for electrical networks in the nature of surge protectors; automated process control systems in the field of electricity generating power plants; life-saving and teaching apparatus and instruments, namely, emergency rescue and teaching apparatus and instruments, namely, fire alarms, anti-intrusion alarms, theft

alarms, personal security alarms, and emergency warning lamps; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electric current and voltage, including parts for all the aforementioned goods, namely, electronic systems for monitoring , protection, regulation and control of power utility assets, namely, electric current, electric power transmission and distribution networks; data-processing equipment, namely, computers and microprocessors; computer software programs dealing with automated process control systems and distribution control systems, namely, process control programs for automated measurement, assembly, adjustment and related visualization and control programs for electric operation control, dealing with the control of electricity generating power plants, industrial nuclear power plants, power distributing boxes, gas and oil pipelines; microprocessors; lasers, not for medical purposes, namely, laser welding machines; chargers for electric general batteries; timer switches (not for clocks); capacitors; electric collectors, namely, electrical cables, electric conductors, electric wires, electric capacitors, electric converters and inverters, electric relays, electric reactors; terminals (electricity), namely, computer terminals, link terminals, programmable terminals and safety I/O (input/output) terminals, electric cable terminals, electricity conduits, electrical power distribution blocks and electrical connection boxes; electric cables, lines and wires; accumulator boxes and junction boxes; identification sheaths for electric wires and identification threads for electric wires; cable ducts; electric coils and electrical inductors; magnetic data carriers, namely, blank floppy discs and blank hard discs; semiconductors; electric and electronic apparatus, devices and instruments including their parts for energy production, distribution and supply, in particular for alternative energy, namely, electrical transformers, electrical switchgear, electrical circuit breakers, electrical contacts, electrical surge arrestors, reactor electric power, compensators, electric semiconductor elements, photovoltaic solar modules, solar panels for production of electricity, batteries; fuel cells; blank recording disks, blank magnetic disks and blank optical disks; data protection apparatus, namely, overvoltage protection solutions in the nature of surge protectors; computer peripheral devices, namely, mouse, keyboards, monitors, printers; current and voltage inverters; current and voltage rectifiers; electric power converters; electrical connection parts, namely, connectors for electrical circuits, power connectors, electrical connector housings and electrical connector boxes; junction sleeves; electrical transistors, thyristors, diodes; semiconductor power elements; electrical transformers; electrical resistors; distribution boards, namely, circuit breaker panels and power distributing boxes; general purpose batteries; integrated switching circuits (chips), namely, computer chips and semiconductor chips; printed-circuit boards; diagnostic apparatus (not for medical use), namely, computer software and databases for use in diagnosis, repair and configuration of computers; anti-interference computer hardware in the field of automated process control systems; memories for data processing apparatus, namely, RAM (random access memory) cards; electric control panels; switches, namely, power switches, pressure switches, timer switches; switchboards; electrical conductors for electric motors, namely, electric commutators; electric relays; modems; electrical ducts; connections for electric lines; electrical measuring and controlling instruments in the form of voltage regulators, namely, timers for recording and measuring electric currents, volt meters; sensors, namely, liquid level sensors and pressure sensors; fuses and electrical safety devices, namely, surge protectors, voltage surge suppressors, voltage surge protectors, electrical surge arresters, circuit breakers and circuit closers , circuit overload protector devices and switchgears; circuit breakers; distribution connection panels , namely, electrical power distribution blocks, power distributing blocks; voltmeters; electric and electronic installations for (remote) control of automated industrial processes, namely, electronic notice boards as well as visual and acoustic warning signals, control panels, distribution consoles, control cables and buttons; steering apparatus, automatic, for vehicles, namely, steering wheels; installations and apparatus for transmitting, switching and controlling electric current, including their parts, namely, electric voltage transformers, high-voltage generators, voltage monitor regulators, voltage monitor modules, voltage regulators for electric power, voltage stabilizers, voltage surge protectors; circuits for heavy electrical current; aerial cables for heavy currents; power switches; transformers, namely, electrical voltage transformers, power transformers, electrical power reactors and parts and fittings therefor; distribution transformers; sockets, plugs and other contacts (electric connections), namely, electrical sockets; solar batteries; (c) apparatus for lighting, heating, cooling and ventilation, including fans, sanitary installations, namely, lighting fixtures, lighting installations, lighting apparatus for power plants, heating elements, electrical control systems for heating systems, air cleaning units, air conditioners, air purifying units, cooling evaporators, electrical control systems for heating and air conditioning systems, industrial air purifiers, ventilating fans, water conditioning units, air-conditioning, air cooling and ventilation apparatus and instruments and fans for motors and engines; ventilating and air-conditioning installations, namely, ventilating fans and ventilating ducts of metal; steam generating installations, namely, steam generators; apparatus for drying, namely, industrial dryers for heating and dehumidifying; apparatus for ventilation, namely , ventilating fans for commercial and industrial use; apparatus for water distribution, namely, metered valves, pressure regulators for water installations, cooling installations for water and water purification and filtration apparatus, namely, water coolers, water distillations units, water sterilizers, water filtering units for industrial use; solar collectors; heat pumps; stoves (heating apparatus); (d) vehicles, namely, boats and locomotives; apparatus for locomotion by land, air or water, namely, funicular railway cars and carriages, fork lift trucks, locomotives, motor coaches, trams, railway coaches, railway cars, railcars, electric drives for vehicles, electric drives for railbound vehicles, trolley buses, cable cars, automobiles, automatic guided vehicles, ships, tankers, boats and marine vehicles, namely, run-abouts; steering gears for ships; driving motors for land vehicles, in particular for rail vehicles

SERVICES

(1) (a) building construction services including consultation in the field of business construction services; repair services, namely, repair of industrial machines, machines tools and electrical installations, repair of computer hardware, repair of office equipment, repair of computer networks; installation services including advice relating thereto, namely, installation of electrical systems, solar energy based power plants, heating, ventilating and air conditioning systems, as well as installation of computer networks and computer systems, including consultation in the field of installation of computer networks and computer systems; maintenance and installation services for industrial installations, namely, installation and maintenance of electrical and generating machinery; installation, setting up, maintenance and repair of computer hardware and office equipment; maintenance of computer hardware, in particular of computers and computer networks; installation, maintenance, repair and interference suppression of electrical and generating machinery; installation and maintenance of oil lines; underwater construction; business consulting in the fields of computer programming, chemistry, physics, solar energy based power plants, electricity generation, chemical engineering, mechanical engineer, computer engineering, automated process control systems, computer networks and computer systems; technical consulting in the fields of computer programming, chemistry, physics, solar energy based power plants, electricity generation , chemical engineering, mechanical engineer, computer engineering, automated process control systems, computer networks and computer systems; (b) scientific and industrial research in the field of mechanical engineering, machines and machine tools, power plants, electricity generation, energy efficiency, energy saving, environmental protection and data processing purposes; programming for data processing purposes; providing computer programs on data networks, particularly on the Internet and the World Wide Web, namely, providing user access to data processing programs via a global computer network; providing technical information concerning the

use of computers, computer hardware, software, computer databases and computer networks; material testing; industrial design services; packaging design services; quality assessment, namely, materials testing, analyzing and evaluation; underwater exploration; engineering consultancy in the field of environmental protection, consultancy in the field of energy saving, technical advice in connection with energy-saving measures, technical consultancy in the field of energy conservation and efficiency; design of computer software in particular in the field of computer security; network engineer services, namely, computer and network security consulting; scientific and industrial research in the field of software and networks online via a computer data bank or via computer networks; updating computer software; performance of chemical analyses; analyses for oil extraction; performance of exploratory drilling operations for oil; monitoring of oil wells; production of analyses for oil extraction, drawing up of experts reports about oil presence; physics research; research in the field of chemistry; services provided by a physicist, namely research in the field of physics; computer support services, particularly in the field of technical security; repair of damaged computers, namely, computer data recovery; software maintenance; computer systems analyses; market research services and development of new products; scientific and industrial research, namely research in the field of machine construction and engineering; technical surveying; computer security consultancy; construction drafting; rental of software for data processing; development of computer software; engineering services, namely, chemical engineering services, mechanical engineering services, civil engineering services, electrical engineering services

Testing apparatus not for medical purposes, namely, laboratory apparatus and equipment for dosage, dispensing, transferring, temperature equalisation, agitating, mixing, diluting, concentrating and separating of liquids, namely, sample reagent dosage dispensers, dispensers for laboratory use, bottle dispensers for laboratory use, sample and reagent temperature equalising heat exchangers, laboratory centrifuges, concentrators, vacuum concentrators, centrifugal concentrators , rotors and accessories for laboratory centrifuges and vacuum taking apparatus, namely, mechanically or optically controlled cannulae; concentrators, thermomixers, microtitre plates and accessories, namely, closing covers, films and foils, caps, cap strips, seals, sealing mats and closures, sample apparatus for processing cells or liquids containing cells, namely, electroporators, micro-injectors and micro-manipulators; dna amplification apparatus, namely, thermocyclers; incubators for bacteria culture; chemistry apparatus and instruments, namely mechanical, electronic and automatic pipettes, pipette tips and pipette tip holders, piston stroke pipettes, racks for pipette tips cuvettes, mechanically, optically and pneumatically controlled cannulas for laboratory use for bringing liquid probes into and out of small vessels, plastic test tubes, measurement and control units for volumetric measurement, for transferring or for dispensing of flowable substances, namely pipette tips, disposable plastic vessels with a maximum volume of 5 ml, and positive displacement syringes with a maximum volume of 50 ml, volumetric measurement syringes, for transferring or for dispensing of flowable substances; diluters, dispensers and parts resembling hypodermic syringes for clinical and biochemistry laboratory diagnosis, controlled volume pumps; laboratory racks and holders for sample storage vessels, reaction vessels and pipette tips; liquid pumps for laboratory use, ventilation hoods for laboratories, freezers, refrigerators, transportable containers with dedicated self contained refrigerators, burettes for dispensing; disposable laboratory articles, namely, sample storage vessels, reaction vessels, pipette tips, namely, conductive, syringe-type parts for pipette devices; tips, namely, pipette tips with integral liquid filters and dispenser tips; tubes, namely, tubes for polymerase chain reaction and micro-centrifuges; micro-injection and micro-manipulating capillaries; computer programs and software for data input, processing, storing and outputting for controlling laboratory equipment for chemical and physical analysis for dispensing, mixing, diluting and separating liquids, namely, physical, chemical, biochemical, optical and electronic analyzing apparatus, namely, photometers, flame photometers and analyzers with ion-sensitive, electrochemical processes and processes based on separating column technology, for all fields of analytical chemistry in clinical chemical laboratories, for use in information processing and control , for sample management and for maintenance of electronic lab notebooks; diagnostic apparatus, not for medical purposes, namely, laboratory units for chemical and physical analysis for dispensing, mixing, diluting and separating liquids, namely, physical, chemical, biochemical, optical and electronic analyzing apparatus, namely, photometers, flame photometers and analyzers with ion-sensitive, electrochemical processes and processes based on separating column technology; polymerase chain reaction (PCR) thermocyclers; laboratory centrifuges; vacuum concentrators; laboratory articles of plastic material, namely, sample supply vessels, laboratory vessel transporting devices for vessel chains and rack devices; optical apparatus and instruments, namely, scientific apparatus, namely, spectrometers and parts and fittings therefor optical readers; optical scanners; scientific, surveying, photographic, optical, measuring, signaling, checking and teaching apparatus and instruments, namely, photometer and spectrophotometer for biological and non-biological samples, namely, for measuring relative DNA, RNA and protein; calculators and computers, and supplementary photometers and spectrophotometers, namely, trays for samples as accessory for use with scientific, surveying, photographic, optical, measuring, signaling, checking/supervising and teaching apparatus and instruments, namely, photometer and spectrophotometer for measuring for biological and non-biological samples, namely for, measuring reactive DNA, RNA, and protein; thermostats, namely scientific apparatus and instruments, namely, temperature controllers for avoiding condensation of equipment and samples in laboratories; laboratory thermostats; laboratory consumables, namely , laboratory reagents; microtitre plates and polymerase chain reaction (PCR) plates; collection tanks and tubes for laboratory purposes, nucleotide or peptide arrays, plates, namely microtitre plates and microtitre filter plates, strips and slides; all aforesaid goods namely for the processing of samples containing nucleic acids; single-use laboratory articles, namely plates in the nature of aperture plates, vessels in the nature of sample storage vessels, containers in the nature of laboratory sample supply vessel containers, scientific apparatus and instruments being laboratory equipment for the processing of fluid samples and reagents, namely, dosers, transferors, mixors, temperors, concentrators, homogenizors and liquid filters; laboratory workstations for the automatic processing of sample liquids and reagents are interlinked and interchangeable, all the aforesaid goods namely for the processing of samples containing nucleic acid; safety cabinets;
